## PROJECTS

### Personal Portfolio Website

- Developed a personal portfolio website using HTML, CSS, and JavaScript to showcase projects and skills.
- Integrated GitHub to display code repositories and project documentation.

### Synology NAS Personal Cloud

- Set up and maintain a Synology DS423+ to host a personal cloud networking system, storing and encrypting my files and other projects.
- Integrated docker to further explore network linked programs, hosting them off my owned domain and allowing private outside access to my home network.
